Summary

- Having **8 years** of native Android development in leading startups like **Freshworks**, Meesho, Rebel Foods (Faasos) and Jugnoo
- Worked on over **12 projects**, including several projects from **scratch** and improved several other products and scaled to **10+ million** users
- Domain experience in Taxi, Food, Delivery and E-commerce, SaaS
- Part of the core team and handled several small teams independently, from the requirement to release

Skills

- Java | Kotlin | Android | Firebase | Compose | RxJava | Room | Coroutines | Realm
- Dependency Injection | Dagger | Hilt | MVVM and Clean Architecture | CI/CD | Jetpack Components | Multi-Module Architecture

Experience

Software Engineer - III

Freshworks

Chennai 10/2023 - 10/2025

- Part of the core development team in Freshworks. Responsible for the development of core mobile apps, including **Freshdesk**, **Freshchat**
- Responsible for daily scrum, release management and new feature development while ensuring code quality

Software Engineer - III

Meesho

Bengaluru 03/2022 - 06/2023

- Led the Meesho Android app's design and development with over **100+ million downloads**. Increase the user experience by working on quality checks, user ratings and reviews, which lead to a **15% reduction** in product returns
- **Developed** the typical tech stack using RxJava, Room, **70% Kotlin**, and **30% Java**, implementing a Multi-module MVVM architecture

Software Engineer - II

Rebel Foods

Mumbai 02/2020 - 02/2022

- Redesign and develop a new product from scratch, known as Eatsure. Headed a team from the architectural decision to develop the finished product with **high crash-free** users maintained with **10m+ downloads**
- Implemented the Slay Coffee app from scratch independently in 3 months with coroutines and Jetpack components

Software Engineer - I

Jungleworks

Chandigarh 08/2017 - 01/2020

- Designed and implemented 3 delivery applications: Agent, Manager and Customer app under a single product, Tookan, for handling 1500+ businesses that required 3 lakh delivery drivers
- **Delivered all projects on time**, including Yelo Marketspace (**20% increase in monthly orders**)
- Created and optimised app experiences for client projects like Honest Bee and Instavans
- **Maintained a 90% client satisfaction rate** by efficiently managing the dev and release cycle with seamless requirements gathering

Education

Bachelor of Engineering

Acropolis Institute

Indore, M.P., India 07/2013 - 07/2017

- Major in Computer science & engineering

Projects

- **MEESHO**: Largest e-commerce application with over 10+ million daily active users with 99.8% crash-free users.
- **EATSURE**: Multi-brand food ordering app. Created with a team of 3 developers from scratch to 50k+ DAU
- **SLAY COFFEE**: **Independently** worked on a coffee booking app for a Bangalore-based coffee brand known as SLAY
- **TOOKAN AGENT**: Android lead of Tookan delivery app for the taxi and delivery workflow over 5 Lakh users
- **TOOKAN MANGER**: **Individually**, the Manager app helps and maintains multiple agents for managers
- **YELO MARKETPLACE**: Developed a Multi-shop marketplace to deliver and manage large shop groups
- **INSTAVANS**: Made an agent app for 1k+ transport trucks on-demand booking and tracking
- **TRACKING SDK**: Maintained an in-house library of delivery tracking and management
